Subject: Oregon CZARA - Strengthening the New Dvpt MM Rationale
Attachments: CitiesCZARA, 9-23-14,dw.xlsx

Jenny,

With regard to the New Dvpt MM, I am mostly concerned with Ashland and Roseburg, since they have significant populations. If we can determine if they will be required to meet DEQ's post construction guidance to address existing TMDLs for bacteria and nutrients, I think we would have a much stronger rationale. It would be nice to capture St. Helens, too, but I don't see how. Any thoughts there are also appreciated.

See highlighted rows attached.

Don

Lastly, for New Development, I still haven't gotten in writing a response from Gene, so will write him again. Sorry for holding back your New Development Rationale (my fault, guys, so don't blame Don!).

Jenny, others,

Jenny – Great work on the pesticides paper. As you were walking us through it on the call today, I kept thinking of one really basic question that kept nagging at me. Hopefully, it has already been addressed and if so, I just need a refresher.
